Children's Village

The Autism Spectrum Disorder (ASD) Diagnostic Clinic occurs two to three times monthly. The team is led by a Developmental and Behavioral Pediatrician and supported by a clinic coordinator. Generally two clinicians/therapists administer the assessment and the child is also seen by a pediatrician to assess overall health or any other health issues that might be present.

Blue Mountain Neuropsychological Associates

BMNA offers comprehensive psychological, forensic, and neuropsychological assessment services. The purpose of their services is to provide culturally sensitive diagnoses, assistance in treatment planning, and render opinions for individuals with a variety of medical and psychological needs. Their reports are inclusive of intelligence (IQ), memory, sensorimotor, language, academic, attention, concentration, executive, and psychosocial functions as indicated. They assess the following for ages six and older:

- Learning disabilities
- Attention deficit and hyperactivity disorders (ADD, ADHD)
- Traumatic brain injury
- Stroke
- Cerebrovascular accidents
- Dementia
- Adjustment disorders
- Mood disorders (e.g., depression; anxiety; bipolar)
- Posttraumatic stress disorder
- Pervasive developmental disorders (i.e., Autistic; Asperger's)
- Competency evaluations (e.g., parenting; custody; forensic; court ordered)
- Independent Medical Evaluations (IMEs)

- Second opinion evaluations
- Pre-surgery evaluations (e.g., bariatric; pain management procedures)
